

High Risk Infant Follow Up (HRIF) Clinic

Our HRIF Clinic is dedicated to your child's development through recurring developmental assessment within the first three years of life. We provide comprehensive medical care, care coordination, resources, and psychosocial support while advocating for early intervention services. Our specialized team of physicians, physical therapists, occupational therapists, speech and language pathologists, and social workers are here to support babies and their families who are born prematurely or with complex medical needs.

Clinic Goals:

- Screen babies considered high risk for developmental delays or neurodevelopmental diagnoses
- Provide continued monitoring and early intervention recommendations
- Identify medical referrals to specialists
- Provide additional care to primary care pediatricians and ongoing therapy

Services offered at our HRIF Clinic:

- Developmental screening of cognition, language, and motor skills using the Bayley Scales of Infant and Toddler Development, 4th edition
- Neurodevelopmental assessment for infants under 12 months old using the Hammersmith Infant Neurological Examination (HINE)
- Feeding screening to ensure your baby is getting proper nutrition
- Physician involvement for comprehensive evaluations
- Personalized care plans and recommendations tailored to your baby's unique needs

Who to Refer?

- Birth weight 1500 grams or less
- PMA 36 weeks or less
- IVH, PVL or cysts
- Hydrocephalus
- CLD
- IUGR
- HIE, Neurological Depression
- Dysphagia, Feeding Difficulties
- Genetic Anomalies
- Drug exposure/withdrawal

When to Refer?

- As soon as a few weeks after discharge home
- Developmental Concerns
- May be followed up to 2 years corrected age

To refer a pediatric patient, call (602) 914-1594 or fax (602) 468-4526

Why choose our HRIF clinic?

- Dedicated multidisciplinary team of experts in infant motor development, feeding, and medical evaluations
- Compassionate care in a nurturing environment
- Comprehensive assessments to address all aspects of your baby's well-being
- Ongoing care coordination and family support

Babies who go home from the NICU or are considered high risk face higher chances of encountering medical and developmental challenges that require close attention. Our goal is for early identification and to assist families with interventions to maximize their baby's potential.

Don't wait, schedule an appointment today to give your baby the best start in life!

About DMG Children Rehabilitative Services (DMG CRS)

We are the largest Multi-Specialty Interdisciplinary Clinic (MSIC) in Arizona and the only MSIC in Maricopa County. Designed to meet the needs of children with complex medical conditions, DMG CRS has been caring for more than 16,000 patients annually since 2012.

We Care for All Pediatric Patients

Families can contact DMG CRS directly to schedule an appointment for their child or be referred by a medical provider, hospital, or community organization.

- No application is required to receive care at DMG CRS
- Most major medical insurance, AHCCCS and AHIP accepted

Coordinated Care and Support

At DMG CRS, our patients and their families are not alone. Our team includes care coordinators and social workers to help families easily access the resources needed both in and outside of DMG CRS to support the health of their children.

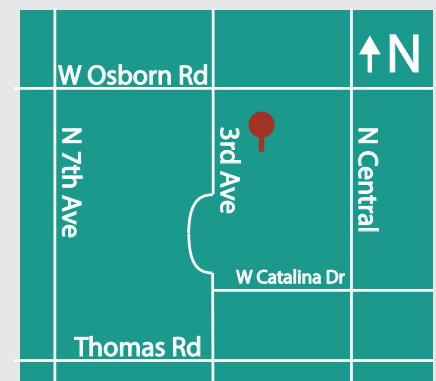

Our goal is to provide whole-patient care. That's why DMG CRS also includes:

- Augmentative and alternative communications
- Casting services
- Child life specialists
- On-site labs, x-rays, and pharmacy
- Physical, occupational, and speech and language therapy
- Registered dietitians
- Wheelchair and equipment evaluations
